TOOL DESCRIPTION

The HP350S hydraulic hand pump unit is tailored for use with Equalizer International hydraulic equipment. It's output is regulated to 700 bar (10,000 psi) and is delivered from an output port threaded 3/8" NPT. The pump can be used with any 700 bar (10,000 psi) rated hydraulic equipment with an oil capacity of 350cc (21.35 in³) or less. The diaphragm oil reservoir means that, unlike conventional hand pump units, the HP350S is operable at all angles and is highly resistant to accidental spillage of hydraulic fluid. For further details please request an instruction manual.
